**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Warm, especially in the valleys, although cooler going into the evening, especially on the hill tops, so some warm clothing still recommended.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 14 Sep 2020	0.2mm	0.2mm	0.6mm

Forecast for Wednesday 16 Sep 2020

Weather: Dry. A mix of clear spells and some patchy cloud, mist or fog during the early hours. Sunny spells developing during the day, then clear spells during the early evening. Through the evening cloud beginning to increase from the north. The cloud will lower onto the hill tops giving some fog above about 400m. The odd spot of drizzle developing too.

Maximum wind: West or northwest 10mph or less with gusts 10 to 15mph, turning east or northeast and increasing 7 to 12mph during the evening, with gusts 17 to 22mph.

Chance of cloud free mountain/hill tops above 600m: 60% given any fog patches at first, then rising to 100% during the day, before dropping to 50% in the evening as cloud lowers onto the hill tops.

Visibility: Poor or very poor in any fog patches, otherwise mainly good to very good.

Temperature: **Valleys:** Plus 13C increasing to Plus 21C during the day then falling to Plus 15C during the evening.
At 600m: Plus 10C increasing to Plus 16C during the day, then falling to Plus 13C during the evening.
Freezing level: Above the summits throughout.
